

## FEATURES

- Trimless design to match Wolf contemporary products.
- Can be mounted flush with countertop.
- Ceran glass-ceramic surface for scratch resistance and easy cleaning.
- Induction elements heat iron and other magnetic cookware instantly, while cooktop surface stays cool.
- Cookware sensing—elements will not be energized without an induction-compatible pan on the surface.
- Bridge zone connects two elements to create a 20cm x 43cm cooking area.
- Wolf exclusive induction elements sense pan size to focus power for optimum performance.
- Boost mode boosts power by diverting power from an adjacent element.
- Wolf exclusive melt setting for gentle heat, and true simmer setting prevents scorching.
- Touch controls display an intuitive power scale for precise control.
- Indicators including boost mode, illuminate on the control panel.
- Control panel lock.
- Independent timer up to 99 minutes.

## INDUCTION COOKING

In induction cooking, the electricity flows through a coil to produce a magnetic field under the glass-ceramic surface. When an induction-compatible pan is placed on the cooktop, currents are induced in the pan and instant heat is generated. Cookware made of magnetic materials, such as cast iron or magnetic stainless steel is required for induction cooking.
